## Model 1200C The Proven Work-Horse

Time-proven and liked by all! Has a 1200 lb. capacity together with all the conveniences you'll want. A popular broadcaster used for spreading fertilizer and all sizes of seeds. Also used for spreading calcium or salt on ice or snow and is ideally suited for golf courses, nurseries, shopping centers, schools,

highways, parks and other large grass areas. Amount of spread per acre of seeds may be controlled down to 3 lbs. per acre. Fertilizer from 50 lbs. to 1,000 lbs. per acre. No Special parts needed to change from seeds to fertilizer. Get any even spread with Herd's easy-adjusted pattern control. Even spread widths up to 40 ft. depending on density of fertilizer or seeds. Rotating agitator and fan driven by heavy-duty enclosed gearbox and shielded power take off shaft. Heavy cast iron gearbox has tapered roller bearings, drop forged gears and is filled with gear oil. Gearbox is standard for 540 rpm, but can be ordered for 1,000 rpm tractors also. Heavy duty 14 gauge steel hopper with welded seams. Round hopper base prevents corner lodging of material, assures better feeding. Rugged construction...2inch square tubing frame with built-in stand.

Model 1200C 3-pt. For Category 2 Tractors  
1200 lbs. capacity-20 cubic ft. – 16 bushels

### OPTIONAL EQUIPMENT

- Lid, 2 pieces.....#1087
- Lime Agitator.....#158 for dolomite or dehydrated lime
- Regular trailer.....#268 and #266 trailer w/45" P.T.O. shaft and 15" wheels, no tires.

## FOR ORCHARDS AND VINEYARDS..... BANDING KITS

### 225 MANUAL BANDING KIT

This unit has 2 control cables that operate independently with 2 separate levers. This allows the operator to spread material to both sides at the same time or to one side or the other. This is accomplished by control levers mounted beside the operator, as shown in picture below.

Also available, the Hydraulic Controlled 225 Banding Kit.

This takes the work out of opening and closing...lets the cylinder do the work.

Individual cables to each

opening...disconnect one for one-sided spreading. Precision openings fine for spreading granular chemicals as insecticides and herbicides. Also available for 225 Banding Kit when mounted on 1200C, the 525 Dual Hydraulic Cylinders for INSTANT-ON...INSTANT-OFF control for right or left spreading. Both style Banding Kits are ideal for spreading fertilizer under fruit and nut trees, in vineyards, nurseries or any place where band spreading is desired. The chutes are adjustable from 60 inches to 34 feet, with no center spread where not needed. (On side spreads such as 34 ft., pattern width is approximately 6 ft., and on 60 inches, pattern width is approximately 18 inches.)

### OTHER OPTIONS AVAILABLE

1200C w/Orchard Trailer, #269 w/Low Profile Wheels & Flotation tires.

#82 – Side-Pattern Kit (Manual Controlled)

#838 – Hydraulic controlled side-pattern kit. (Must have 1000 kit installed)

#180 – Manual Controlled Banding Kit
