

# 750S WITH HYDRAULIC MOTOR on Skid Steer

*Since 1992  
Herd has the  
products  
you need for  
spreading  
wet sand.*

With our 750 Sand Spreader and the new skid-steer mounting plate with hydraulic motor you can use your skid-steer unit to spread sand and sand mixed with other ice and snow melter.

Easy to hook up with a flow valve on the hydraulic motor to control your width of spread from the driver's seat.

Your skid-steer must have the capacity to pick up and transport 1600 pounds for you to safely operate this spreader.

Parts Needed: #629 - Skid-Steer Plate  
#267C - Hydraulic motor and valve  
#750 - Sand Spreader less PTO Shaft
